Sizewell C – the key environmental and other issues of concern

A seminar for councillors, council officers and concerned interest groups on the issues around developing a new nuclear reactor at Sizewell

The seminar is a free event open to councillors and council officers, groups involved on nuclear policy, on environmental policy and those simply interested in this subject matter. It is part of the NFLA's and the NGO's views on challenging the need for new nuclear build and show the fossil free, nuclear free alternatives to mitigate climate change and deliver 'zero carbon' towns, cities and counties.
